Oral Assessment

What is an Oral Assessment?

An oral assessment is a direct means of assessing students’ learning outcomes by questioning them. Unlike interviews which usually have a structured question list, oral assessment does not usually have a structured list of questions; assessors ask questions and request responses depending on the circumstances.

There are three typical types of oral assessments:

1. Oral assessment after a direct observation assessment
   An oral assessment is often used as part of a de-briefing session after a practical has been observed. The time duration is usually 3-5 minutes. There is usually no formal structure, assessors usually ask questions as they foresee, however, assessors may plan some general questions in which all students will encounter during the practical.

2. Oral in the form of a viva voce
   A viva voce is the Latin name for oral examination, often given for a university examination with spoken questions and answers. It is usually used to describe the oral examination at a postgraduate level, conducted after the submission of the thesis for a research degree to ensure that the candidate knows enough about the subject to make it at least plausible that the dissertation is his own work. Vivas are traditionally conducted by an external and an internal examiner. There is no set time limit for a viva voce, but a full day examination is often normal.

3. Oral/Aural in a language setting
   Oral in a language setting is a direct speaking test geared at assessing a student's level of speaking proficiency. Aural in a language setting is a listening test (often by devices such as tapes) geared at assessing a student's level of hearing proficiency.

Questions asked in classroom setting do not contribute as oral assessments, as not all students have the benefits of being assessed.

Structure of Oral Assessment

The structure of an oral assessment depends on the type of oral assessment, but in general, the followings are used.

1. Depend on which type of oral assessments, it is sometimes desirable to allow the student to start the oral assessment by giving an account of the analysis of the practice. The sophistication of his spontaneous account can reveal far more than simply his responses to the questions. Questions such as: How do you think you did?
2. Probing questions – to initiate and engage the student in conversation. Questions such as: How did you know that? What method did you use to arrive with that conclusion?
3. Prompting questions – to give hints that point the student to the right direction to clarify his response, this however does not mean the assessor answers the questions himself. Questions such as: Remember the experiment on xx? What do you think this relates to?
4. Challenging questions – to assess the deep understanding - the higher level of Blooms taxonomy. Questions such as: Can you justify why your method is more efficient than Prof. Einstein's?
Advantages of Oral Assessment

- There can be no plagiarism or false reports.
- Assessors receive immediate reactions and responses.
- It complements perfectly with practical assessments.

Disadvantages of Oral Assessment

- Oral assessment is very time-consuming, it is an expensive way of assessing.
- Validity is high but reliability is not. Clear assessment criteria and grading are required for all parties so that students and assessors are fully aware of how the performance will be judged to increase reliability.
- There are rarely any clear guidelines about what is fair to judge at a viva. There have been some contentious cases that the assessor has rejected or even failed a dissertation because the assessor is unwilling to accept the results of a candidate due to difference in opinions. Although there will be examiners' reports, there is rarely any record of the process itself to ensure its fairness.
- Oral assessment may present significant difficulties for international students or students with certain impairments, who may require access to an alternative type of assessment that provides an acceptable test of learning outcomes. Students with some other impairments may be able to undertake oral assessment but may require some adjustments in order to have an equal footing.
- Immediate feedback is useful, but sometimes that is difficult due to time constraints.
- Oral assessment is usually ephemeral, and dissenting views may later be contested if notes or recordings are not documented clearly.
How to design a good Oral Assessment?

1. Ensure the students know what the objectives of the assessment are.
2. Provide students the time period, location, guidelines, requirements, assessment criteria and if there are items that are not to be included. The students should also be aware of who is going to assess them – tutor, peers and/or self? And if peers or themselves are going to assess, would the weightings be the same as the tutor’s assessment?
3. Prepare a structured marking sheet for all assessors.
4. Give sufficient time for students to respond.
5. Teacher should incorporate oral assessment into the practice of teaching during class, e.g. how to think out loud.

Marking Rubrics

Below is a sample of marking rubrics and grading standards for an oral assessment after a direct observation assessment: (From Recipe for Success, accessed 05 July 2008 http://myt4l.com/index.php?v=pl&page_ac=view&type=tools&tool=rubricmaker)

<table>
<thead>
<tr>
<th>MARKING RUBRICS</th>
<th>Excellent</th>
<th>Proficient</th>
<th>Average</th>
<th>Poor</th>
</tr>
</thead>
<tbody>
<tr>
<td>Content:</td>
<td>All content directly related to the topic. Opinions were always supported by fact if possible.</td>
<td>Content directly related to the topic. Almost all opinions were supported by facts.</td>
<td>Demonstrated Basic understanding of the topic. Many opinions were not supported by facts.</td>
<td>Few facts related to the topic. Most Information was opinion.</td>
</tr>
<tr>
<td>Knowledge:</td>
<td>Showed a thorough knowledge of the topic. Able to use assessor questions to further demonstrate understanding of the topic. Appeared to be an expert on the subject being presented</td>
<td>Showed a working knowledge of the topic. Able to satisfactorily answer assessor questions and provided additional information upon request.</td>
<td>Showed basic knowledge of the topic. Able to address assessor questions by repeating parts of the presentation - did not provide any additional information.</td>
<td>Showed little or no knowledge of the topic. Unable to answer assessor questions or comment further on any part of the presentation.</td>
</tr>
<tr>
<td>Posture/Eye Contact:</td>
<td>Stood upright and appeared confident throughout. Avoided rocking, shifting, and other nervous behavior. Made eye contact throughout the assessors.</td>
<td>Posture was good for most of the presentation. Made eye contact numerous times during presentation. Did not rely too heavily on notes or visual aids.</td>
<td>Sometimes rocked, shifted, or appeared uncomfortable. Made occasional eye contact with one or two audience members. Did not rely too heavily on notes or visual aids.</td>
<td>Posture was poor. Slouched, shifted from foot to foot, and appeared very uncomfortable. Made almost no eye contact with the audience. Looked down at notes or visual aids.</td>
</tr>
<tr>
<td>Enthusiasm:</td>
<td>Appeared enthusiastic and confident at all times. Moderated level of excitement to hold audience’s attention.</td>
<td>Appeared enthusiastic and confident at all times. May have appeared overly enthusiastic at times. Held audience interest</td>
<td>Showed some confident and little excitement about the topic. Attempted to modify behavior to engage audience on</td>
<td>Showed little or no enthusiasm about the topic. Nervous. Did not moderate level of excitement in response to audience</td>
</tr>
